

# 123 GO Fish Game

## Directions

4 players

Deal 12 cards to each player.

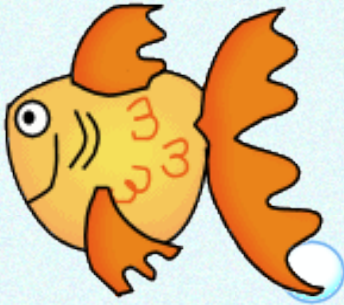

Place the remaining cards in a face down pile in the center of the table. Player one asks any player for a numeral/number word that matches one of his/her cards.

If the player has a match it is passed to player one who places the matching cards on the table together and then takes another turn. If the player does not have a match then player one can "Go Fish" a card in the remaining pile (take one). Then it is player two's turn.

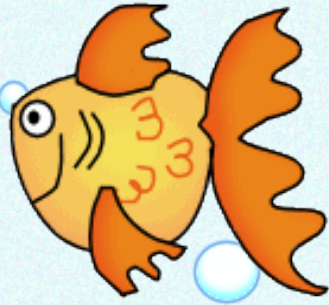

Play continues until one of the players matches all of their cards.

This game can be played using just numerals, just number words, or one set of each.
